

SNAG WEIGHT

A weighted treble hook, or a Snag Weight, is used to retrieve objects from the bottom. Where legal, it is also used to catch fish by snagging. The weight directly on the hook provides good casting characteristics and holds your line in the water. Check local fishing regulations for legality.

KEEL-HOOK DECOY WEIGHT (J-STYLE)

This weight will save you time, eliminate decoy bag tangles and prevent decoy paint wear. It hooks to the decoy's keel and is easily removed even while wearing gloves on those cold, dark mornings. Decoys that are easy out + easy in = more time to hunt. Uses neoprene tubing.

Component attachments: 2 plastic O-rings; 3 -C style Hog Rings; 1 - 10" neoprene tubing.

STRAP DECOY ANCHOR - INGOT MOLD

This one-piece, three-cavity mold makes either strap type duck decoy anchors or lead ingots. There are two different levels of fill in each cavity. When making duck decoy anchors, use soft lead and fill the cavity only to the first (lower) level to make six ounce flexible strap anchors. Fill the mold up to the second (top) level to make lead ingots weighing up to sixteen ounces. A melter and a ladle with capacity to hold a minimum six ounces of lead are required. An electric Hot-Pot melter/ladle also works well. This mold is not intended to be used with bottom pour furnaces.

DECOY ANCHOR WEIGHTS

These anchor weights have been an old standard of duck hunters everywhere for years. The mushroom shape is best in soft bottom areas. The pyramid shape is favored in hard bottom locations where it has less tendency to roll with a current.

WRAP-AROUND DECOY ANCHOR

This is the answer to the problem of moving decoys between different depths of water. Line is wrapped around the body of the anchor. It can be easily set for any depth by tightly wrapping the line off around one of the ears. A weight of this type eliminates retying the line during a change in water depths.

BLANK MOLDS FOR CUSTOM DESIGNS

After a great season of sports fishing, haven't we all thought we might have stumbled on a new solution for a jig, lure or sinker. Unfortunately the Do-It Corporation cannot produce custom work, so we created the Blank Mold. Your local tool and die or machine shop can create a custom cavity for the Blank Mold based on your design. We recommend getting a quote for this service before ordering your blank mold, as custom machine shop work can be pricier than you'd imagine.
